Job Title: Senior Full Stack Developer (8+ Years Experience)

Location: Kathmandu, Nepal

About the Role:

We are seeking a highly skilled and experienced Senior Full Stack Developer with over 8 years of experience, specializing in modern web technologies and cloud platforms, to join our growing team. The ideal candidate will have a proven track record as a Fullstack Software Engineer, strong leadership capabilities, and will be instrumental in designing, developing, and implementing scalable applications across various domains.

Responsibilities:

- Lead the design, development, and implementation of scalable APIs and front-end applications using modern frameworks.
- Architect and integrate with various platform components and custom connectors.
- Design and implement robust plugins and extensions for enterprise platforms.
- Drive research and optimization efforts, including implementing microservices architecture and advanced service endpoints.
- Architect and implement integrations with diverse external systems.
- Implement and manage automated testing and CI/CD pipelines.
- Oversee the integration and maintenance of security roles and access management, ensuring compliance.
- Provide technical leadership and mentorship to junior developers, fostering cross-functional collaboration with teams and stakeholders.
- Lead significant software development projects from conception to deployment.

Skills and Qualifications:

- Experience: 6+ years of progressive experience as a Fullstack Software Engineer.
- **Team Leadership:** Proven working experience as a team lead.
- **Programming Languages:** Expert proficiency in multiple modern programming languages (e.g., JavaScript, TypeScript, C#, Python).
- **Frameworks:** Extensive experience with multiple modern front-end and back-end frameworks (e.g., Node.js, React.js, .NET).
- Databases: Proficient with various database technologies (e.g., MongoDB, PostgreSQL, MySQL).
- Cloud Platforms: Strong experience with major cloud platforms (e.g., Azure, AWS, GCP).
- **DevOps:** Expertise in CI/CD, containerization (e.g., Docker), and orchestration tools.
- **Specialization:** Experience with microservices architecture.
- **Compliance:** Knowledge of industry compliance regulations (e.g., HIPAA, GDPR, SOC2) is highly desirable.
- Education: Bachelor's degree in Computer Science, Engineering, or a related field.
- Exceptional problem-solving, analytical, and architectural design skills.
- Excellent communication, interpersonal, and leadership abilities.
